Professional Summary

Computer Science student at Emerson University Multan (CGPA: 3.53), specializing in Data Analytics, Python, SQL, Business Intelligence, and Web Scraping. Skilled in data cleaning, exploratory data analysis, dashboard development, and structured data extraction using Excel, Power BI, Pandas, Requests, and BeautifulSoup. Focused on building practical analytical solutions through hands-on projects and automation.

TECHNICAL SKILLS

Data Analytics
Data Cleaning, EDA, Data Transformation, KPI Reporting, Data Visualization

Microsoft Excel
Advanced Formulas, Pivot Tables, Pivot Charts, Power Query, Dashboards

Power BI & Tableau
Interactive Dashboards, Data Modeling, DAX, Calculated Fields, Visual Reporting

SQL & Databases
Joins, CTEs, Aggregations, Subqueries, Window Functions, Database Design

Development Tools
Git, GitHub, VS Code, Jupyter Notebook, Google Colab

Relevant Projects

Web Scraping & Data Collection System | Python, BeautifulSoup, Pandas
CodeAlpha — Data Analytics Project
- Developed a Python-based web scraping workflow to extract structured information from public web pages.
- Implemented HTML parsing, CSS selectors, pagination handling, and data cleaning.
- Organized extracted records into structured datasets for further analysis and CSV/Excel reporting.

Exploratory Data Analysis | Python, Pandas, Matplotlib, Seaborn
CodeAlpha — Data Analytics Project
- Performed exploratory data analysis to examine dataset structure, data types, missing values, and distributions.
- Applied data cleaning, aggregation, and visualization techniques to identify patterns and relationships.
- Presented analytical findings through charts and documented observations.

Financial Health Dashboard | Power BI, Power Query, DAX
CodeAlpha — Business Intelligence Project
- Designed an interactive financial dashboard to analyze revenue, expenses, profitability, and financial trends.
- Used Power Query for data preparation and DAX measures for key financial indicators.
- Developed visual reports to support financial monitoring and budgeting decisions.

Human Resources Analytics Dashboard | Power BI, Power Query, DAX
CodeAlpha — Business Intelligence Project
- Created an interactive HR dashboard covering employee turnover, recruitment, workforce distribution, and performance indicators.
- Prepared and transformed HR data using Power Query and developed measures using DAX.
- Visualized workforce trends to support data-driven HR planning and decision-making.

Certificates

- Data Analyst Certificate — Coursera
- Professional IT Short Course | Local Institute (Multan)
- Freelancing Certificate — DigiSkills
- Python Certificate — Coursera
- Certificate in Information Technology (CIT) | NAVTTC
- Data Analytics Certificate | DigiSkills (Ignite / MoITT)
- Technical Content Writer & Web Publisher | Online Solutions World

Education

2023 – Present
Bachelor of Science in Computer Science
Emerson University Multan
CGPA: 3.53 / 4.00
Relevant Areas: Database Management Systems, Programming, Data Analytics, Web Technologies, Software Fundamentals

2021 – 2023
Multan, Pakistan
Intermediate
KIPS College Multan
Marks: 805 / 1100

2019 – 2021
Multan, Pakistan
Matriculation
Govt High School Rangeel Pur Multan
Marks: 1092 / 1100
